

ngena – business alliance of the 21st century

Leading international telecommunication companies are forming the **Next Generation Enterprise Network Alliance – ngena**. Business customers benefit from network services, realized on complementary partner networks around the globe. More than 20 additional service providers are expected to join this industry-shaping alliance over the next years.

ngena – paving the way for a truly globalized economy

ngena comes with a completely new business model and a new technology in a greenfield setting, sharing network assets of trusted service providers. With **ngena** the alliance partners pave the way for a truly globalized economy.

ngena – cutting edge technology. Always.

The key enabling cloud and virtualization technology for the alliance will be provided by Cisco. **ngena** offers a hybrid VPN with additional service options and leverages the rapid spread of Software Defined Networks (SDN) and innovative cloud technology. Thanks to the use of agile development **ngena** will always provide future proof services. The result: A new global business network that is easier to use, more stable, better scalable and less complex than any other solution in the market – **ngena**.

ngena – connecting the global business

The physical and virtual network assets will be managed through InterCloud hubs in Europe, America and Asia using automated provisioning, to increase agility in service provisioning across continents.
