

ngena stands for “Next Generation Enterprise Network Alliance”. We provide a central cloud platform that merges the local networks of our international telecommunication alliance partners into a single global Software-Defined Wide Area Network (SD-WAN).

SD-WAN Service Orchestration Specialist (m/f/d)

Have you always dreamed of working for an international start-up company? Then take this next step into the future and join us as our new colleague for a full-time position in Frankfurt am Main (D) or Kosice (SK).

Your new job

- As part of the Platform Development team, you are responsible for translating business requirements into a technical solution design which can be built based on our “SD-WAN as a Service” offering
- Analyzing service orchestration improvement options & issues and contributing to technical root cause analysis
- Organizing technical requirement refinement interactions including vendors & other internal engineering teams
- Development of platform as a service leveraged products using NETCONF protocol and YANG specification based orchestration engines
- Creation of low level and high level documentation of software defined WAN (SD-WAN) products and features
- Evaluation of defects impact on product roll-out and taking adequate actions to mitigate risks to customers

Your assets

- You have successfully completed your university degree in computer science or a similar subject
- Deep working knowledge of design and implementation of networking technologies such as VPN, IPSec, SD-WAN services, network segmentation and dynamic routing protocols such as BGP and OSPF
- You possess a deep understanding and working experience in zero touch provisioning systems
- Around 3 years' working experience with well known software defined network (SDN) architecture and virtual infrastructure management platforms such as Openstack
- Experience working with different compute virtualization technologies
- Experience working with Linux OS, programming languages such as Python and common DevOp tooling
- Familiar with Cisco's Network Service Orchestrator (NSO) and SD-WAN controller technologies such as vManage or similar
- You're proactive and able to work independently and possess the flexibility to act convincingly within agile structures
- Able to create documentations and communicate fluently in English

Your chance

An exciting, dynamic, international start-up environment awaits you with an open corporate culture of flat hierarchies. At ngena, responsibility will be in your hands from the very beginning. You will continuously grow both on the professional and personal front amongst a diverse team of more than 20 nationalities, varied age groups and a wide range of skill-sets. This fusion will prepare you for paving the world with ngena's leading SD-WAN technology.

If you are interested in this challenge, please send us your complete application including salary expectations and possible starting date via email to myfuture@ngena.net
