

ngena stands for “Next Generation Enterprise Network Alliance”. We provide a central cloud platform that merges the local networks of our international telecommunication alliance partners into a single global Software-Defined Wide Area Network (SD-WAN).

Chief Information Security Officer (CISO) (m/f/d)

Have you always dreamed of working for an international start-up company? Then take this next step into the future and join us as our new colleague for a full-time position in Frankfurt am Main.

Your new job

- Managing the daily implementation and operation of the IT security strategy
- Continuous assessment of current IT security practices & systems and identifying areas for improvement
- Running security audits and risk assessments
- Delivering new security technology approaches and implementing next generation solutions
- Managing the IT security budget as well as the department, giving leadership to the team & developing people
- Ensuring compliance and governance for security and data privacy are always met and intellectual property of the organization is protected
- Developing and implementing business continuity plans to ensure service continuity
- Analyzing security designs and provide advisories to ensure compliance and minimize the risk of cyber-attacks
- Communicating digital programs and strategies to a range of stakeholders
- Reporting to the board and being an active member of the senior management team

Your assets

- Several years of work experience (including at least five in a management role)
- Successfully completed Master's degree in computer science or in a related field
- Experience in introducing, extending and maintaining an ISMS; experienced in security operations
- You're familiar with Data Privacy regulations (GDPR) from technical / processual perspective
- You're capable of empowering and leading an IT team to meet business and IT security goals
- Passionate about tech and security – you love keeping pace with latest thinking & development
- Communicating relevant security topics to and with different audiences comes very easily to you
- You understand relevant security-centric tech, like DNS, authentication/authorization, VPN, proxy services, IDS/IPS, certificate handling, DDOS mitigation technologies etc.
- You possess experience in coding practices, ethical hacking and threat modeling and know about typical network and webservice security technologies
- You've dealt with security related frameworks (e.g. BSI, PCI, NIST) and compliance assessments in the past
- Fluent in English and (ideally) in German; knowledge of Spanish would be a plus
- Nice-to-haves: security certifications such as CISSP or CISM

Your chance

An exciting, dynamic, international start-up environment awaits you with an open corporate culture of flat hierarchies. At ngena, responsibility will be in your hands from the very beginning. You will continuously grow both on the professional and personal front amongst a diverse team of more than 20 nationalities, varied age groups and a wide range of skill-sets. This fusion will prepare you for paving the world with ngena's leading SD-WAN technology.

If you are interested in this challenge, please send us your complete application including salary expectations and possible starting date via email to myfuture@ngena.net
