

ngena stands for “Next Generation Enterprise Network Alliance”. We provide a central cloud platform that merges the local networks of our international telecommunication alliance partners into a single global Software-Defined Wide Area Network (SD-WAN).

Senior Technical Security Engineer (m/f/d)

Have you always dreamed of working for an international start-up company? Then take this next step into the future and join us as our new colleague for a full-time position in either Kosice (SK), Frankfurt (DE) or Debrecen (HU)!

Your new job

- Engineer, implement, and monitor security measures for the protection of computer systems, networks and information
- Identify and define system security requirements and support teams to automate them
- Develop technical solutions to help mitigate security vulnerabilities and automate repeatable tasks
- Ensure that the company knows as much as possible, as soon as possible about security incidents
- Write comprehensive reports, including assessment-based findings, outcomes and propositions for further system security enhancements
- Last level support in security incident situations
- Technical security advisory to reach high level of security for production of customer services and employed supporting IT systems incl. standard cloud infrastructures
- Special expert based security testing of new releases, new devices for internal and customer services
- Collaboration with responsible eng. teams & vendors to ensure consideration of security requirements & advisories

Your assets

- Several years' working experience as a System Security Engineer and/or Information Security Engineer
- You have successfully completed your university degree in Computer Science or similar
- You're capable of translating typical customer requirements into security advisories on a deep technical level
- You're familiar with common security standards such as CIS, NIST CSF, MCSS, CISA, COMPTIA+, ISO27001 etc.
- Deep knowledge of Cisco SD-WAN and other Cisco devices
- Detailed technical knowledge and hands-on experience: Linux operating system, network and public cloud security
- Hands-on experience on security systems, e.g. anti-virus, AAA, log management, content filtering, encryption, hardening, network security etc.
- Thorough understanding of the latest security principles, techniques, protocols and testing methods
- You're familiar with web related technologies (Web applications, Web Services) and of network/web related protocols as well as with network orchestration and automation
- You're a good problem-solver and you keep calm even in stressful situations

Your chance

An exciting, dynamic, international start-up environment awaits you with an open corporate culture of flat hierarchies. At ngena, responsibility will be in your hands from the very beginning. You will continuously grow both on the professional and personal front amongst a diverse team of more than 30 nationalities, varied age groups and a wide range of skill-sets. This fusion will prepare you for paving the world with ngena's leading SD-WAN technology.
