

ngena stands for “Next Generation Enterprise Network Alliance”. We provide a central cloud platform that merges the local networks of our international telecommunication alliance partners into a single global Software-Defined Wide Area Network (SD-WAN).

## Test Manager Quality Assurance (m/f/d)

Have you always dreamed of working for an international start-up company? Then take this next step into the future and join us as our new colleague for a full-time position in either Frankfurt (DE) or Tysons/VA (USA)!

### Your new job

- You'll be accountable for all aspects of Quality Assurance (QA) including the release of applications with high quality, setting quality standards, status reporting, as well as learning, development, and mentoring of QA associates
- Developing and nurturing key relationships with all critical stakeholders and partners to facilitate effective communication, manage expectations, and deliver results
- Anticipating program testing and release problems and taking corrective action, escalating as needed, to achieve commitments
- Develop, manage, report, and use QA metrics to identify areas for performance improvement
- Be a thought leader in the field of QA and help shaping and aligning department processes and procedures to meet delivery expectations
- Contribute to team innovation activities, requested prototyping, or R&D activities

### Your assets

- You've been working in software development for at least 10 years, preferably with 5+ years leading an Agile Software QA team
- You possess network experience with SD-WAN, ideally CISCO, and understand SDN and associated architecture
- You're experienced in leading globally dispersed & large QA teams and in assessing & building talent
- Thorough knowledge of methodologies of QA standards, including expertise in manual and automated testing and associated tools and technologies
- Strong understanding of the SDLC process
- You're familiar with Waterfall, V-Model and Agile methodologies (including Scrum, Kanban)
- You're familiar with Test Tools such as Jira, Confluence, Microsoft Office Suite
- Excellent leadership and organizational skills, great attention to detail, and a results-driven approach
- Nice-to-haves: degree in computer science or equivalent, ISTQB Foundation Certificate, ability to write code in any language

### Your chance

An exciting, dynamic, international start-up environment awaits you with an open corporate culture of flat hierarchies. At ngena, responsibility will be in your hands from the very beginning. You will continuously grow both on the professional and personal front amongst a diverse team of more than 30 nationalities, varied age groups and a wide range of skill-sets. This fusion will prepare you for paving the world with ngena's leading SD-WAN technology.
