

ngena stands for "Next Generation Enterprise Network Alliance". We provide a central cloud platform that merges the local networks of our international telecommunication alliance partners into a single global Software-Defined Wide Area Network (SD-WAN).

Team Lead Platform Security (m/f/d)

Have you always dreamed of working for an international start-up company? Then take this next step into the future and join us as our new colleague for a full-time position in either Frankfurt a. M. (Germany), Kosice (Slovakia), or Debrecen (Hungary)!

Your new job

- You'll advise, support, and lead the technical security team for the ngena platform
- You'll have technical/operational responsibility for security applications, e.g. Splunk, Nessus, IDS&IPS, PKI
- Fulfilling a lead technical advisory role to ensure a high level of security for the technical platform
- Improving and structuring SecOps monitoring capabilities across all our IT systems
- Assist with hand-over to SecOps for standard tasks, leading support to Operations for more complex security topics covering all ngena IT systems (2nd/3rd level SecOps)
- Assisting and advising on penetration testing when related to the technical platform
- Support and advise on risk assessments related to platform security
- Support ISO27001 certification activities and assume a technical advisory role
- Support and advise in implementing company security policies
- Technical advisory role as part of ngena requirement management, support with technical expert knowledge in internal projects

Your assets

- Successfully completed master's degree in computer science or a comparable qualification
- Several years' working experience in the security environment, thereof min. 2-3 years in a management role
- You're a great communicator and people manager, capable of motivating and steering a team
- You're experienced in introducing, extending, and maintaining an ISMS
- Good knowledge of Cisco SD-WAN and managed network services
- Good knowledge of public cloud security as well as typical network and web service security technologies
- Experience in software development and related security
- Experience in Security Operations, related responsibilities & processes
- You understand relevant security-centric tech, like DNS, authentication/authorization, VPN, proxy services, IDS/IPS, certificate handling and DDOS mitigation technologies etc.
- Coding practices, ethical hacking, and threat modeling
- You're familiar with security related frameworks such as ISO 27001, BSI, PCI, NIST, and compliance assessments
- You're fluent in English; knowledge of Spanish and/or German is a plus

Your chance

An exciting, dynamic, international start-up environment awaits you with an open corporate culture of flat hierarchies. At ngena, responsibility will be in your hands from the very beginning. You will continuously grow both on the professional and personal front, amongst a diverse team of more than 30 nationalities, varied age groups and a wide range of skill-sets. This fusion will prepare you for paving the world with ngena's leading SD-WAN technology.
