

ngena stands for "Next Generation Enterprise Network Alliance". We provide a central cloud platform that merges the local networks of our international telecommunication alliance partners into a single global Software-Defined Wide Area Network (SD-WAN).

Platform Architect (m/f/d)

Have you always dreamed of working for an international start-up company? Then take this next step into the future and join us as our new colleague for a full-time position in either Tysons/VA, USA or Košice, Slovakia.

Your new job

- Design, test, develop and enhance network services in ngena SD-WAN service profile
- Work closely with the Product Managers, Solution Architects and 3rd party providers to understand the business requirements
- Analysis of service orchestration improvement options, and contributing technical root cause analysis
- Work closely with teams to collaborate and to develop cutting edge technologies
- Help create network design, architecture and workflow documents
- Working in a dynamic and an agile environment

Your assets

- Successfully completed university degree in CS or a similar subject with 6+ years of working experience
- Network Automation/Orchestration skillsets in frameworks and toolsets, including Cisco Network Service Orchestrator (NSO) with Netconf/YANG and service data modeling, and familiar with Layered Services Architecture (LSA)
- Hands-on experiences, in-depth knowledge and design expertise for SD-WAN, MPLS VPN, Firewall, Network Security, Networking routing protocols, Routers and Switches and TCP/IP communication protocols
- You have network programmability skills / a good understanding of Software Defined Networking (SDN) , Jinja2, REST APIs, NETCONF, YANG, Terraform, JSON and XML
- Capability and experience to communicate with different parties and transform business requirements into technical design and specifications and work with development team to drive for a feature implementation
- Knowledge of Cisco and Industry Cloud computing (i.e. Openstack, VMWare and AWS), Data Center Virtualization, Storage and Networking solutions, NFV and MANO service architecture, Docker, Kubernetes VIM, ESC, NFVO, VNF and SD-WAN Controller
- Experience on Linux Operating System with administration, scripting skills, CI/CD process and DevOps tools
- Proactive and being able to work independently; flexibility to act convincingly within agile structures
- Able to create documentations and communicating fluently in English

Your chance

An exciting, dynamic, international start-up environment awaits you with an open corporate culture of flat hierarchies. At ngena, responsibility will be in your hands from the very beginning. You will continuously grow both on the professional and personal front amongst a diverse team of more than 30 nationalities, varied age groups and a wide range of skill-sets. This fusion will prepare you for paving the world with ngena's leading SD-WAN technology.
