

ngena stands for "Next Generation Enterprise Network Alliance". We provide a central cloud platform that merges the local networks of our international telecommunication alliance partners into a single global Software-Defined Wide Area Network (SD-WAN).

UX Designer (m/f/d)

Have you always dreamed of working for an international start-up company? Then take this next step into the future and join us as our new colleague for a full-time position in Reston, Virginia.

Your new job

- Definition, design and user interaction through prototypes and UX patterns from concept to implementation
- Working closely with Product Managers, business stakeholders, Customer Experience, and UI development to prototype new or build the UX/UI of existing applications
- Creating new concepts with wireframes, producing mockups, writing detailed documentation, and critically assessing designs
- Develop personas, usage scenarios, usability studies and testing
- Interview with clients and users to understand their goals and explain research results
- Analyzing user feedback and activity, and iterating to enhance the user experience
- Craft visuals that help illustrate and reinforce storytelling from end-to-end
- Design web page layout and online content, user interface graphics, icons, color schemes, content and infrastructure for new product release and new web-hosted product offering

Your assets

- 2-5 years of user interface design experience with Web applications, desktop, mobile applications and the ability to produce and deliver design assets
- You have a degree in the fields of Graphic/Visual Design, Cognitive Science, Human Computer Interaction, Interaction Design, or related disciplines
- Fluency in Adobe Suite, Microsoft PowerPoint, Sketch, Photoshop, Figma, etc.
- Understanding of UX trends and current design strategy and technologies.
- Understanding of software development
- Strong portfolio demonstrating excellent command of composition, typography, color & fundamental communication
- Good understanding of user interface design, heuristic methods, or usability evaluation techniques, perception, cognition, task analysis, experimental design, and statistics
- Knowledge of web and mobile technologies, including social networking and messaging information architecture and other productivity applications
- Superb communication skills, keen problem-solving and organizational abilities
- Creativity, passion and attention to detail; self-directed but also collaborative
- Nice to have: Experience in B2B software applications, telecom domain, ServiceNow

Your chance

An exciting, dynamic, international start-up environment awaits you with an open corporate culture of flat hierarchies. At ngena, responsibility will be in your hands from the very beginning. You will continuously grow both on the professional and personal front amongst a diverse team of more than 30 nationalities, varied age groups and a wide range of skill-sets. This fusion will prepare you for paving the world with ngena's leading SD-WAN technology.
