Connectivity Platform as a Service

QuickSizer

QuickSizer by ngena: Design a software-defined network with just a few clicks

QuickSizer is a fully online tool that lets you build powerful SD-WAN architectures using a simple and user-friendly interface.

QuickSizer by ngena enables you to quickly begin building a software-defined network. Whether it's supporting a remote worker or an enterprise-class redundant network, QuickSizer makes designing a new SD-WAN environment simple and fast.

Select from ngena's library of pre-engineered Access Designs, easy to consume bundles combining hardware, software, licensing, public and private Internet links, security options, analytics services, Quality of Service parameters, and more.

ngena Access Designs empower you to modernize quickly and easy, automating thousands of manual tasks and accelerating the deployment of SD-WAN so that you can gain agility and rapidly respond to business demands without the need for forklift upgrades, months-long projects, or risk CAPEX investments.

All-in-One Managed Service from ngena

SD-WAN as a Service from ngena includes:

- All hardware, routers, and CPE equipment
- Cisco SD-WAN (Viptela), Cisco Meraki, or Hybrid Solutions of both
- Software and licenses
- Public and Private Internet link
- Retail, Manufacturing, Finance

Accelerate Modernization with SD-WAN as a Service

QuickSizer turbocharges the SD-WAN experience, empowering you to scope an entire network architecture with just a few clicks. It's just one way in which the ngena one-touch connectivity platform powers transformation. QuickSizer is just the beginning, with powerful automated workflows in the ngena platform providing even more toolsets for enhancing and deploying your network.

Everything from changing service terms to reconfiguring CPEs to handle new workloads is done through ngena's centralized single pane of glass dashboard. With SD-WAN delivered as a flexible service, NetOps and IT leaders have the power to meet new demands quickly, keeping the business ahead of the curve and ensuring the utmost in performance, availability, and innovation.

Cisco SD-WAN delivered on your terms

The ngena platform provides an unmatched range of choice and customization for your networking needs. Select from Cisco SD-WAN (Viptela), Cisco Meraki, or hybrid solutions of both- all from a centralized singular platform. With ngena, you can mix and match the best of all Cisco SD-WAN product sets to craft a solution that is custom-fit for your exact needs.
