

COMPANY OVERVIEW

it's time to enter the **one-touch** connectivity world

ngena is the only global end-to-end orchestrated SD-WAN as-a-Service company

why ngena

one touch connects the world

ngena unites companies of all sizes along with their global workforce through a centralized connectivity network experience.

With one touch, ngena provides comprehensive, integrated, fully automated, highly flexible and easy to use connectivity services to any location in the world, delivered by a global cloud platform to enable business customers on their digital journey to the cloud.

speed to market

more free time coming right up

Our next-generation SD-WAN as-a-Service solutions put our partners in the driver's seat. This provides access to prebuilt and preconfigured cloud networking solutions — by using our standardized models that truly fulfill customer needs and best practices, our partners gain speed to market, business value and outcomes.

ngena automatically deploys precisely designed networks, makes it easy to select multiple access points, get networking solution quotes in minutes and allows our partners to deploy projects all from one place.

meeting market demands — each customer has a unique digital journey to the cloud

Enterprises today face a range of challenges as digitalization, remote working, globalization and new IT solutions call for flexible-managed services and ready-to-use cloud network solutions.

ngena meets these challenges head on by providing state-of-the-art multi-cloud and virtualization SD-WAN technologies, that enable a company's digital transformation with speed, agility and the latest innovative application services. Pre-designed configurations are ready to be deployed or further customized to fit any client's unique connection to the cloud.

the ngena connectivity platform — it's something special

ngena is built on Cisco technology and includes security built-in, essential services and pre-configured features. This makes it the only solution of its kind in the market today.

Our platform is designed for multi-cloud managed as-a-Service connectivity. We've built it for cloud economies. This means a flexible experience with no hardware investments, project management or long design configuration times.

platform overview — 3 easy steps

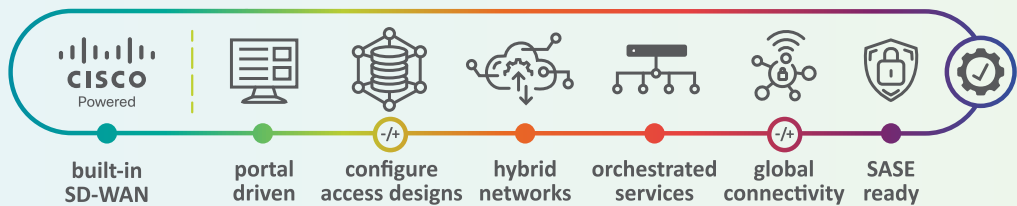

Right from the start, our partners have everything they need, as a managed service in one service catalog.

select & quote

The QuickSizer configuration tool is purpose built for designing, quoting and deploying networks in minutes, not months. Easily select your access points, visualize your network and get an instant quote. You'll get the ultimate commercial flexibility from the way you design your global networks to being able to BYO access, licenses and devices to the platform.

2. enhance

enhance technically

Built on Cisco SD-WAN, ngena includes essential services and pre-configured features. Your network will be built with flexibility, speed and the most up to date security.

Pick from pre-configured designs, expand your market size with hybrid networks and connect globally all from our cloud-based portal.

3. deploy

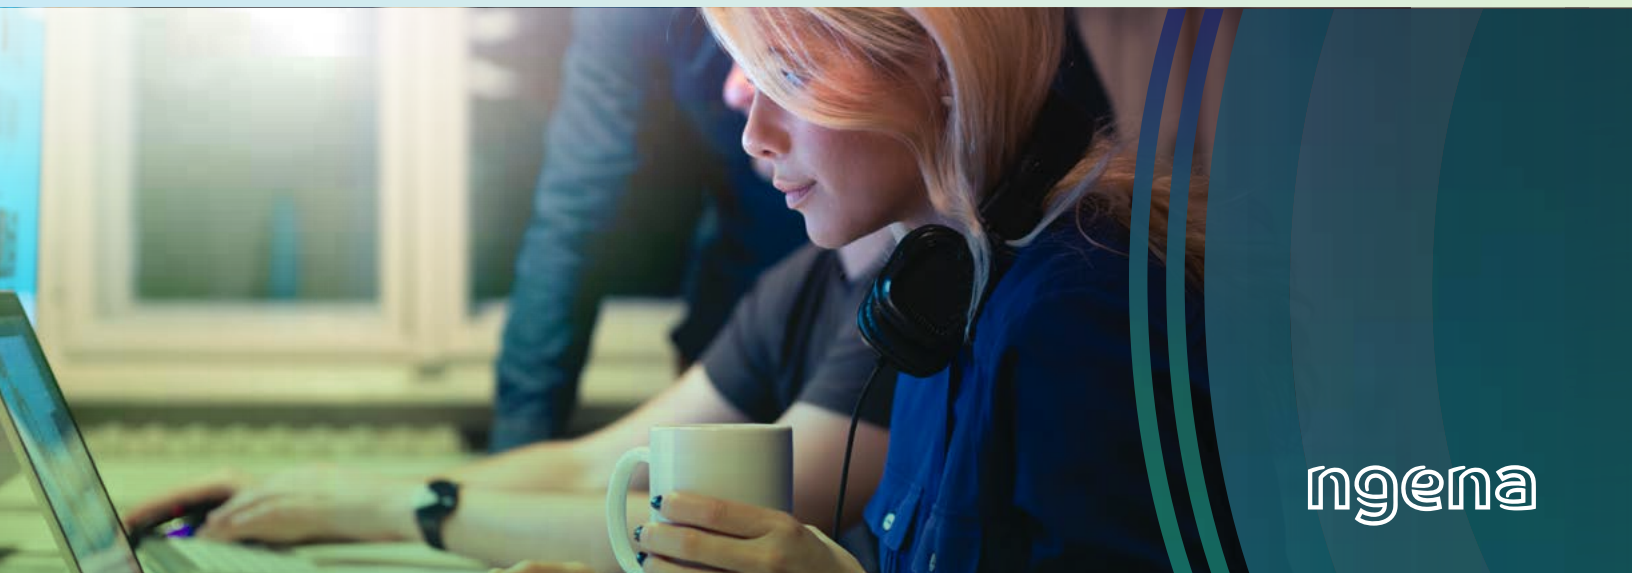

deploy & manage

Our zero-touch deployment gives you end-to-end global delivery of your network. You'll be up and running fast and securely. And, don't worry, we're here to help along the way. We even have a team of installation experts if you need physical lines and boxes. Ongoing management and operations

We deliver best-in-class operations and management options for the platform. If you need to make changes to your configurations, you can at any time. Your SLA is fully committed, and you can be billed on a simple monthly basis.

Full visibility, 24x7 monitoring and an automated incident management process will give you peace of mind.

customize networks by choosing one or more of the following:

Meraki SD-WAN

Secure and simple cloud-based management of entire networks

Cisco SD-WAN (Viptela)

Solution for complex enterprise networks

The ngena hybrid integrated network

Cost-effective solution for a combination of simple and complex networks to expand your networks from small businesses to enterprise locations

ngena@home

Provides the enterprise experience directly to the remote workforce

tech built for humans

our partners

We always have our partners in mind. That's why we've assembled a best-in-class ecosystem of providers and system integrators, located in over 200 territories worldwide, for our partners to rely on.

Having partners across the globe has given us vast experience in building international corporate networks. We're providing global service with local care and attention.

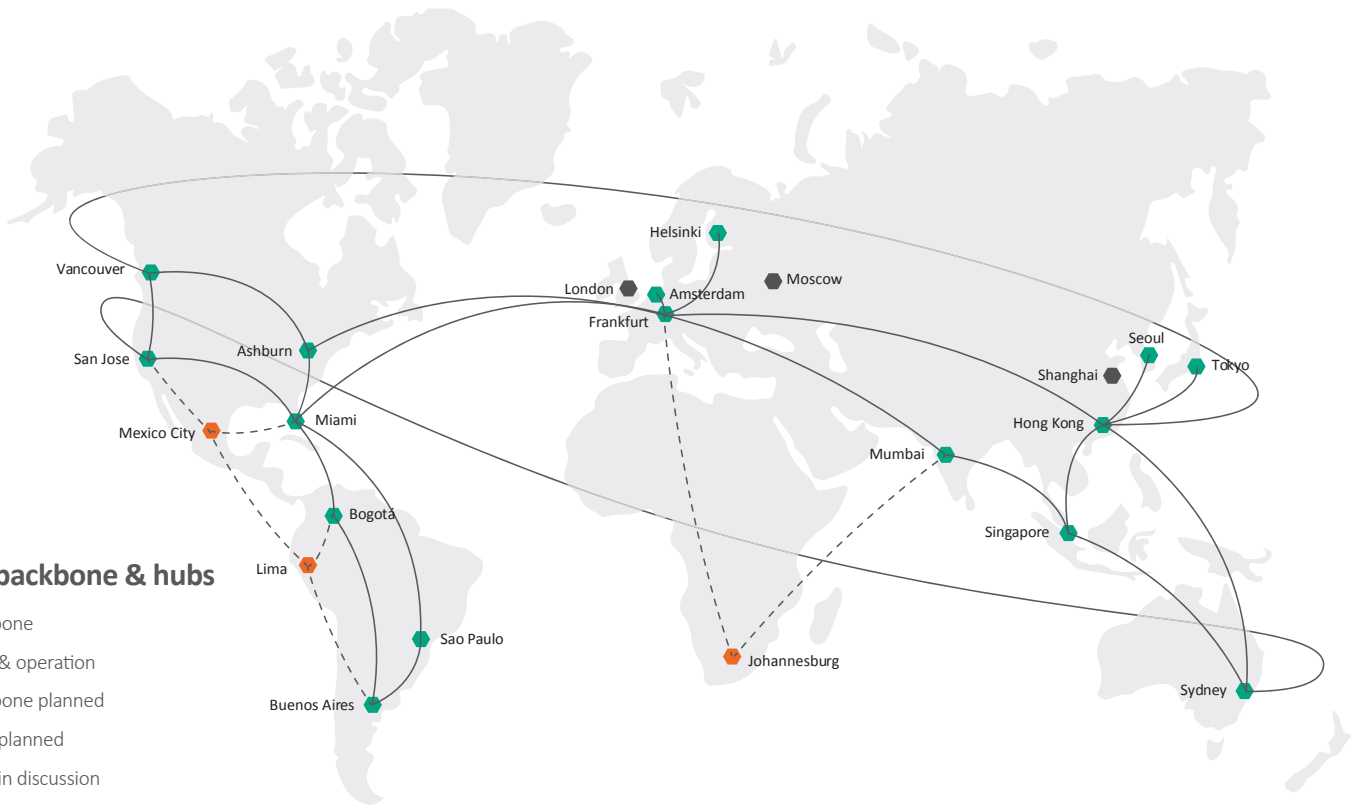

our team

We're here when you need us.

Our solutions are built for ease of use, and we also have technical teams across the globe available 24/7, just in case.
